

SOFTWARE ENGINEERING CAREER OPPORTUNITIES AT SKYLINE COMMUNICATIONS

About Skyline

Skyline Communications (www.skyline.be) is the global leading provider of advanced monitoring and control software solutions for the HFC broadband, satellite, broadcast and telecommunications industry.

Our **DataMiner** multi-vendor network management platform is today recognized as a state-of-the-art software platform and is deployed by over a hundred leading operators in the aforementioned industries on all continents around the world.

This includes for example Abertis Telecom (Spain), Belgacom (Belgium), Broadcast Australia (Australia), Telenet (Belgium), Etisalat (United Arab Emirates), Eutelsat (France), France Televisions (France), Gazprom (Russia), KPN (The Netherlands), MTV (United Kingdom), Pro Sieben (Germany), Telefonica (Spain), Telenor (Norway), UPC (Poland), and many more (<http://www.skyline.be/Company/References.htm>).

DataMiner
One solution addressing all your needs

TELECOM SOFTWARE SYSTEM ENGINEER (Izegem)

JOB DESCRIPTION

Our System Engineering department is at the center of the deployment of our high-tech and cutting-edge **DataMiner** software platform in the systems from leading operators around the globe. System Engineering offers exciting career opportunities for both junior and experienced engineers, and a plethora of career choices to match your personal qualities, expertise and ambitions.

After an intensive training, and with the support of your colleagues, over time you can profile yourself as a driver or component developer, technical account manager, training instructor, system designer and consultant, expert trouble shooter, and much more in line with your personal ambitions. And you also have a choice to work in an internal role, or if desired to take up responsibilities that take you around the world.

REQUIREMENTS

- A degree in telecom, ICT and/or software engineering.
- Junior and senior profiles are acceptable.
- Solid written and oral language skills in French and/or English.
- Knowledge of Dutch is an asset but not a must.
- Solid and profound knowledge of MS Windows OS family (XP Pro, 2003 & 2008 Server).
- Solid and profound knowledge of TCP/IP networks (IP addressing, routing, firewall, VPN, VLAN's, etc...) is an asset.
- Specific experience with principal equipment vendors such as Cisco is an asset, as well as TCP/IP network troubleshooting skills.
- Knowledge of the .NET environment and C#.
- Previous experience or knowledge about the technical environment of satellite teleports, HFC Broadband systems, broadcast facilities and/or telecom systems is an asset.
- Knowledge about or experience with HTML, XML, client/server systems, SNMP, ... are strong assets.
- Strong oral and written communications skills is an asset.
- Knowledge or experience with project management is an asset.
- Motivation and passion for exploring and learning new software technologies on the fly.
- Driver license [B].

OUR OFFER

- You will join a team of young, enthusiastic, professional colleagues and will work with them in the exciting world of broadband, broadcast and satellite.
- Opportunity to work with the state-of-the-art software platforms in a high-tech environment, for renowned customers and systems deployed world-wide.
- Many opportunities for both junior and senior profiles, and many career paths available to match your personal qualities and ambitions.
- Steadily growing and stable company, internationally active.
- Competitive salary & benefits.
- Continuous improvement and personal development are stimulated.

SOFTWARE DEVELOPER (Izegem)

JOB DESCRIPTION

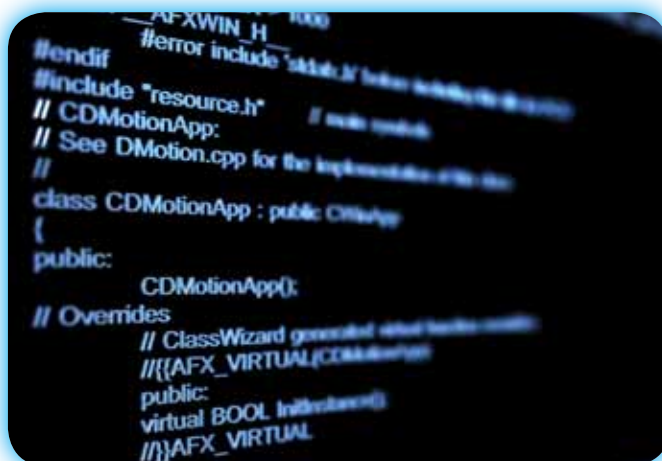

Designing and developing cutting-edge software applications (deployed by leading operators around the globe) with MS Visual Studio, and using the very latest software development technologies, in a talented and dynamic team, ranging from WPF user interfaces in C# to server side components in C++ (depending on personal interests and qualities).

REQUIREMENTS

- Good knowledge of C++, C# and .NET Framework.
- Solid knowledge of MS Windows OS family (XP, 2003) and MS Visual Studio is a must.
- Experience with relational databases is an asset.
- Knowledge of TCP/IP, Web Services, .NET Remoting and multithreading is an asset.
- Knowledge of or being prepared to learn one or more of the following technologies: WPF, MFC, HTML, XML, ASP.NET, ... is a must.
- Motivation and passion for exploring and learning new software technologies on the fly.
- Solid written and oral communication skill.
- Available for junior and senior profiles.

OUR OFFER

- You will join a team of enthusiastic, professional and talented colleagues and will work with them in the exciting world of broadband, broadcast and satellite.
- Opportunity to work with the very latest software development technologies in a high-tech environment, for renowned customers and systems deployed world-wide.
- Steadily growing and stable company, internationally active.
- Competitive salary & benefits.
- Continuous improvement and personal development are stimulated.
