

DATAMINER

CERTIFIED CONSULTANTS

EMPOWER YOUR CONSULTANCY WITH DATAMINER

As a DataMiner certified independent consultant, you could hold all the keys to unlock the full potential of the operation of your clients. The powerful combination of general industry expertise and profound knowledge of the global leading end-to-end NMS & OSS platform DataMiner will enable you to empower the business of your clients.

DATAMINER AS THE KEY TO SUCCESS

The global market of broadcasting, telecommunications, satellite, cable and mobile operations is increasingly embracing the use of the highly functional and flexible DataMiner end-to-end network management and orchestration software technology to cover its OSS and BSS. Today, **DataMiner has become one of the most strategic assets for leading operators** around the globe to successfully achieve the highest levels of productivity and to efficiently tap into the full potential of their ever more complex technology ecosystems.

GROWING NEED FOR INDEPENDENT CONSULTANTS

The growing number of deployments of the DataMiner technology also causes an ever-increasing demand for independent consultancy services, with industry-specific expertise and the ability to translate operational needs into tangible customer-specific solutions empowered by the DataMiner platform. **Therefore, it is more relevant than ever for independent consultants, contract engineers, operators and developers to get up to speed on the latest functionality, capabilities and solutions of DataMiner.**

become the key
to the highest possible productivity

OBTAIN YOUR DATAMINER CERTIFICATION

Empower yourself with DataMiner training and **obtain a widely acknowledged official DataMiner certification**. It will not only improve your options in providing powerful performance and production workflows and effectively **validate your personal industry expertise and skills**, but will also ultimately allow you to **provide your clients with an even greater return on their DataMiner technology investments**.

- widely acknowledged and highly valued official DataMiner Training & Certification
- provide your clients with user experience at operator, administrator and advanced level
